

# The Nation's Leading Authority on Sex Offender Management

**Over ten years ago, WatchSystems took on the nationwide demand for sex offender management by creating OffenderWatch® – a web-based system that provides offender registration, ongoing compliance management, and community notification.**

In the years since OffenderWatch® was conceived, Watch Systems has become the nation's leading authority on sex offender management, and OffenderWatch® has evolved into the most powerful technology platform in the industry. Watch Systems' knowledge of law enforcement, state legislation trends, and national policy compliance, along with our ability to deliver a state-of-the-art management solution have helped make us the consultant to over 600 departments and to 11 state enforcement agencies.

**Watch Systems is much more than a vendor to our clients—we are their partner.**

We stay abreast of industry trends and new laws as they become relevant, and we advise policy makers as to how to maximize their implementation. We get to know each state's workflow, and we tailor a solution to meet their satisfaction. We help our clients get total statewide participation in OffenderWatch® through awareness and training. We empower the user base to maximize their time and resources, and in the process, help them get more funding. And through continuous updates to OffenderWatch®, annual performance audits and always-available training, Watch Systems makes sure that our clients are making the most out of their time and investment.

**Want to know how Watch Systems can help you?**

## OffenderWatch: The Industry Standard

### Legislative/Compliance:

OffenderWatch® is a single solution for all state offices associated with registration, verification and reporting to register offenders, update a central state database and comply with registered sex offender management laws while providing inter-agency communication and community notification. OffenderWatch® fully meets the minimum provisions of the Adam Walsh Act without modification by the state or local user and stands ready for the SORNA rules if and when they are needed.

### Cost-Effective:

OffenderWatch® makes the most of an agency's limited resources by maximizing the "time-to-offender" ratio: the time an agent must spend on the file of each offender. Though precise offender address mapping, inter-agency alerts, automated calendar appointments and full document archiving of state forms and photos with the offender record, OffenderWatch helps agencies get more done in less time with fewer resources. And since OffenderWatch® is web based, there is no computer hardware investment.

### Intelligent:

OffenderWatch® features user-defined state-level rules, which allow local customization and flexibility within state parameters. OffenderWatch® is intelligently networked, promoting interaction among agencies, counties, and other states running the System. OffenderWatch® also syncs with NSOPR daily.

### Reliable:

OffenderWatch® is a web-based system that provides 24/7, worry-free technology with 100% up-time. Our maps are proprietary and our geo-coding is cross-checked with postal records, creating maps with guaranteed level of accuracy that can't be touched by open source maps.

### Public Service:

OffenderWatch® provides an effective means of community notification via a single platform which generates neighborhood maps, automated postcards and email distributions.

### It Works!

OffenderWatch is in use by over 600 agencies nationwide, and is the standard statewide sex offender management platform in 11 states.
